The Graduate Studies and Research sector, Faculty of Science, Tanta University, aims to encourage graduate students and young researchers to showcase their practical results and theoretical findings from their Master and PhD theses, with an eye on the development of the middle Delta region. This is to link scientific research with industry to revive the community and encourage future scientists to present their new findings from the scientific results to represent their faculties and universities in scientific forums inside and outside Egypt. This is to help the exchange of experiences between students and professors in various scientific fields. The Faculty of Science, Tanta University, is honored to organize "The Second Conference of Postgraduate Students in Science" (PSS II).
